# The ipLDK Range

ipLDK Range

Growing your business, not it's costs

# Growing your business, not your costs

The ipLDK Range has been carefully designed and developed, using over 40 years of experience and expertise, to map a successful future for your business.

The ipLDK Range incorporates all the latest telephony functionality designed from a user perspective.

Features are logical, easy to use and remember. So, if it's ease of operation you require, such as one-touch transfer or paging, or more advanced functionality to enhance the competitive edge of your business, such as VoIP, networking, Computer Telephony Integration (CTI), the ipLDK Range is the solution.

Presenting your business to your customers is all important, so the ipLDK Range, with its Automated Attendant functions, Call Centre features with comfort messaging, and integrated Voice Mail board will demonstrate the professional edge you want to portray.

#### The ipLDK Range capacity information.

ipLDK50 is capable of up to 40 lines and 48 extensions.

ipLDK100 is capable up to 40 lines and 96 extensions.

ipLDK300 is capable up to 200 lines and 288 extensions.

ipLDK300E is capable up to 384 lines and 576 extensions.

#### Grow your business, not your costs

The ipLDK Range is a true family of systems, using a common range of stylish and innovative 7000 series digital handsets, and a high percentage of common device/peripheral boards.

As your business grows, the common basic architecture of the systems in the range allow you to expand your communications needs.

Automated Attendant

VoIP

Remote Working

Call Centre

CTI

The freedom to stay in touch

Remote Working and Mobility are key to a successful business today, so the ipLDK Range allows you to connect and work wherever you are. For users requiring mobility at the desk the Bluetooth module for the 24 button handset allows movement of up to 5m.

For users requiring mobility around the office site, all systems in the range support the European DECT standard (GAP compatible), with stylish mobile handsets and base stations providing roaming and seamless handover of calls.

Your Home or Remote Office can be connected using the LG-Nortel IP Phone giving a transparent connection to your office system.

The perfect tool for the business traveller is the LG-Nortel IP softphone, which can be installed onto your laptop.

This gives you the freedom to access your business phone system from anywhere in the world through broadband services. The system can even link your mobile phone to your desk extension, allowing you to take calls when you are out, and even transfer them back to other system extensions.

The ipLDK Range also gives the option to move to VoIP when the time is right for your business. Because it has evolved from traditional PBX technology it can be installed and operated as a traditional telephone system, whilst at any stage you can integrate the advanced VoIP technology into your business operations.
